

Appl. No. 10/643,559

Art Unit:3634

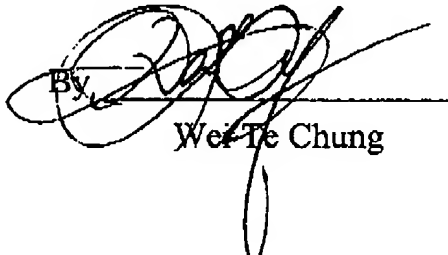

Reply to the Office Action of February 22, 2005

In response, Applicants prefer further prosecution of Group One: claims 1-7.
This election is made with traverse.

The limitation of "the wing panels encircling portions of the half-sleeve shaft" in claim 1, and that of "the wing panels encircling portions of the half-sleeve shaft" of claim 8, and that of "each of said wing panels integrally extends from around an inner half circumference of said main body" are essentially same with one another. This common limitation links these three groups of claims together disregarding whether they are of the combination or sub-combination. Based upon this common patentable feature, it is believed that claims 1-15 should be examined together without necessity of restriction.

Respectfully submitted,

HUANG ET AL.
